

UnifAI Model Providers & MCP Server Guide

Platform Architecture, Complete Provider Directory, Logo Engineering & MCP Server Integration

Status: Complete & Verified | 93 Model Providers | 178 MCP Servers | Codebase v2.0

1. Executive Summary & Thanglish Overview (Mukiya Vilakkam)

Indha manual-la UnifAI platform kulla irukura **Model Providers** pathiyum, **MCP (Model Context Protocol) Servers** pathiyum complete full details irukku. Platform kulla total-ah 93 built-in model providers and 178 MCP servers support pannirukom. Logo rendering epadi theme-aware SVG-ah dynamic-ah work aagudhu, and MCP server epadi step-by-step add panrathu nu real codebase examples vachu inga describe pannirukom.

2. Complete 93 Model Providers Directory (Built-in)

Below is the complete exhaustive directory of all 93 providers in ui/lib/constants/logs.ts:

#	Provider ID	Provider Label	Logo / Icon Type	Embed
1	ai21	AI21 Labs	Theme SVG	No
2	bedrock	AWS Bedrock	Theme SVG	Yes
3	bedrock_mantle	AWS Bedrock Mantle	Theme SVG	No
4	aionlabs	AionLabs	Theme SVG	No
5	dashscope	Alibaba DashScope	Theme SVG	No
6	anthropic	Anthropic	Theme SVG	No
7	anyscale	Anyscale	Theme SVG	No
8	arcee	Arcee AI	Theme SVG	No
9	azure	Azure	Static WebP	Yes
10	baichuan	Baichuan	Theme SVG	No
11	qianfan	Baidu Qianfan	Theme SVG	No
12	baseten	Baseten	Theme SVG	No
13	cerebras	Cerebras	Theme SVG	No
14	cerebrium	Cerebrium	Theme SVG	No
15	cohere	Cohere	Theme SVG	Yes
16	dashscopecn	DashScope China	Theme SVG	No
17	deepinfra	DeepInfra	Theme SVG	No
18	deepseek	DeepSeek	Theme SVG	No
19	dit	Dit.ai	Theme SVG	No
20	elevenlabs	Elevenlabs	Theme SVG	No
21	empower	Empower AI	Theme SVG	No
22	fastinfra	FastInfra	Theme SVG	No
23	featherless	Featherless AI	Theme SVG	No
24	fenay	Fenay AI	Theme SVG	No
25	fireworks	Fireworks AI	Theme SVG	Yes
26	freeai	Free.ai	Theme SVG	No

#	Provider ID	Provider Label	Logo / Icon Type	Embed
27	freeinference	FreeInference	Theme SVG	No
28	freemodel	FreeModel	Theme SVG	No
29	friendli	FriendlyAI	Theme SVG	No
30	gmiserving	GMI Serving	Theme SVG	No
31	gemini	Gemini	Theme SVG	Yes
32	groq	Groq	Theme SVG	No
33	huggingface	HuggingFace	Theme SVG	Yes
34	hyperbolic	Hyperbolic	Theme SVG	No
35	inceptionlabs	Inception Labs	Theme SVG	No
36	inferencenet	Inference.net	Theme SVG	No
37	jina	Jina AI	Theme SVG	Yes
38	kluster	Kluster AI	Theme SVG	No
39	krutrim	Krutrim	Theme SVG	No
40	lepton	Lepton AI	Theme SVG	No
41	lingyiwanwu	Lingyi Wanwu	Theme SVG	No
42	mancer	Mancer	Theme SVG	No
43	minimax	MiniMax	Theme SVG	No
44	mistral	Mistral AI	Theme SVG	Yes
45	modelscope	ModelScope	Theme SVG	No
46	monsterapi	MonsterAPI	Theme SVG	No
47	moonshot	Moonshot AI	Theme SVG	No
48	morphllm	MorphLLM	Theme SVG	No
49	nlpcloud	NLP Cloud	Theme SVG	No
50	nvidia	NVIDIA NIM	Theme SVG	No
51	nanogpt	Nano-GPT	Theme SVG	No
52	nararouter	NaraRouter	Theme SVG	No
53	navy	Navy AI	Theme SVG	No
54	nebius	Nebius Token Factory	Static WebP	Yes
55	nousresearch	Nous Research	Theme SVG	No
56	novita	Novita AI	Theme SVG	No
57	nscale	Nscale	Theme SVG	No
58	ollama	Ollama	Theme SVG	Yes
59	openai	OpenAI	Theme SVG	Yes
60	openadapter	OpenAdapter	Theme SVG	No
61	opencode-go	OpenCode Go	Theme SVG	No
62	opencode-zen	OpenCode Zen	Theme SVG	No
63	openrouter	OpenRouter	Theme SVG	Yes
64	opper	Opper	Theme SVG	No
65	parasail	Parasail	Theme SVG	No
66	perplexity	Perplexity	Theme SVG	No
67	portkey	Portkey	Theme SVG	No
68	publicai	PublicAI	Theme SVG	No

#	Provider ID	Provider Label	Logo / Icon Type	Embed
69	reka	Reka AI	Theme SVG	No
70	relace	Relace	Theme SVG	No
71	replicate	Replicate	Theme SVG	No
72	runware	Runware	Theme SVG	No
73	runway	Runway	Theme SVG	No
74	sgl	SGLang	Static WebP	Yes
75	sakana	Sakana AI	Theme SVG	No
76	sambanova	SambaNova	Theme SVG	No
77	sarvam	Sarvam AI	Theme SVG	No
78	scaleway	Scaleway	Theme SVG	No
79	sensenova	SenseNova	Theme SVG	No
80	siliconflow	SiliconFlow	Theme SVG	No
81	stepfun	StepFun	Theme SVG	No
82	hunyuan	Tencent Hunyuan	Theme SVG	No
83	together	Together AI	Theme SVG	No
84	totalgpt	TotalGPT	Theme SVG	No
85	upstage	Upstage	Theme SVG	No
86	vertex	Vertex AI	Theme SVG	Yes
87	ark	Volcengine Ark	Theme SVG	No
88	voyage	Voyage AI	Theme SVG	Yes
89	wafer	Wafer	Theme SVG	No
90	zhipu	Zhipu AI	Theme SVG	No
91	spark	iFlytek Spark	Theme SVG	No
92	vllm	vLLM	Theme SVG	Yes
93	xai	xAI	Theme SVG	No

3. Logo & Image Engineering Architecture

Theme-Aware SVG Vector Rendering: Icons in `ui/lib/constants/icons.tsx` use React components inspecting `theme === 'light' ? fill='black' : fill='white'`.

Brand Path Accuracy: Providers like Cerebras, DeepSeek, AWS Bedrock, and Cohere use branded paths and linear gradients preventing pixelation.

Static WebP Assets: Select enterprise logos (e.g. Azure) load via optimized `<img src='/images/azure.webp'/>`.

Custom Provider Fallback: Any dynamically added OpenAI/Anthropic custom provider defaults to a server/database icon with a visual 'Custom' badge.

4. MCP Server Ecosystem (Total 178 Servers)

- UnifAI bundles 178 production-ready MCP servers across 14 categories from `configs/mcp-library.json`:
- **Developer Tools (15):** GitHub, Supabase, Linear, Vercel, Cloudflare, Neon, Context7, Filesystem, GitLab.
 - **Productivity (8):** Notion, Slack, Atlassian, Asana, ClickUp, Todoist, File Storage.
 - **Search (25):** Brave Search, Exa, Tavily, Goji, Agentic News.
 - **AI & Automation (60+):** Hugging Face, Playwright, Docs MCP, Browser Workflows.
 - **Finance & Observability:** Stripe, PayPal, Sentry, PostHog, HubSpot, Twilio.
 - **Transports:** 132 HTTP servers, 43 STDIO process servers, 3 SSE servers.

Server Name	Category	Transport	Description / Publisher
GitHub	Developer Tools	HTTP	Official GitHub MCP — repos, issues, PRs, and code search via GitHub C...
Supabase	Developer Tools	HTTP	Official Supabase MCP — manage projects, run SQL, and inspect schemas.
Linear	Developer Tools	SSE	Official Linear MCP — issues, cycles, and project backlog over SSE.
Vercel	Developer Tools	HTTP	Official Vercel MCP — projects, deployments, and docs for your Vercel ...
Cloudflare	Developer Tools	HTTP	Official Cloudflare MCP — Workers, DNS, and account tooling.
Notion	Productivity	HTTP	Official Notion MCP — search and edit pages and databases in your work...
Slack	Productivity	HTTP	Official Slack MCP — search workspace, read threads, and post updates.
Atlassian	Productivity	HTTP	Official Atlassian MCP — Jira and Confluence context for agents.
Asana	Productivity	STDIO	Asana MCP — tasks and projects (stdio).
ClickUp	Productivity	STDIO	ClickUp MCP — tasks and workspaces (stdio).
Brave Search	Search	STDIO	Official Brave Search MCP — web search via Brave Search API (stdio).
Exa	Search	STDIO	Exa MCP — neural web search and content retrieval for agents (stdio).
Tavily	Search	STDIO	Tavily MCP — AI search API for agents (stdio).
Goji	Search	HTTP	AEO, SEO, web and brand answers from a Melbourne agency's published gl...
1325.AI	Search	HTTP	Verified directory of 44,000+ Black-owned U.S. businesses. Search, map...
Playwright	Automation	STDIO	Official Playwright MCP — browser automation and web testing tools (st...
AgentUtility Browser Workflow	Automation	STDIO	MCP server for the @agentutility browser-workflow cluster pay-per-ca...
Stripe	Finance	HTTP	Official Stripe MCP — customers, subscriptions, payments, and billing ...
PayPal	Finance	STDIO	PayPal MCP — payments and commerce APIs (stdio).
Sentry	Observability	HTTP	Official Sentry MCP — error tracking, issues, and monitoring context.
PostHog	Observability	STDIO	PostHog MCP — product analytics and feature flags (stdio).
Hugging Face	AI	HTTP	Hugging Face MCP — models, datasets, and Spaces tooling (remote).
inference.sh	AI	HTTP	Run 150+ AI apps image, video, audio, LLMs, 3D and more. Browse, exe...
Docs Mcp	AI	HTTP	Remote MCP server for Tandem docs, install guides, SDKs, workflows, an...
aTars MCP	AI	HTTP	Crypto market signals, technical indicators, and sentiment analysis fo...
Agentberg	AI	HTTP	Agent-to-agent trading intelligence exchange. Publish findings, vote o...

5. Step-by-Step MCP Server Installation & Publishing Guide

Method A: 1-Click Install from MCP Library

1. Go to `/workspace/mcp-registry/library` and find your server (e.g. GitHub, Notion, Brave).
2. Click **Install** to open `mcpLibraryInstallSheet`.
3. Name is automatically sanitized via `sanitizeServerName()`.
4. Enter required tokens (Bearer PAT or Environment Variables).
5. Click **Save & Install** — UnifAI conducts the MCP handshake, extracts tools, and activates the client.

Method B: Publishing a Custom Internal MCP Server

1. Click **Add Custom Server** in the MCP Library.
2. Choose Transport: `http/sse` (URL) or `stdio` (command + args + envs).
3. Select Authentication Mode: `none`, `headers`, `oauth`, `per_user_headers`, or `per_user_oauth`.
4. Save to publish org-wide across your enterprise workspace.

6. Concrete Real-World Codebase Examples

Example 1: GitHub MCP Server (Remote HTTP + OAuth/PAT)

- **URL:** `https://api.githubcopilot.com/mcp/`
- **Exposed Tools:** `search_repositories`, `get_file_contents`, `create_issue`, `create_pull_request`.
- **Execution:** Virtual Key carries Tool Group -> Chat prompt sends task -> Gateway invokes Copilot endpoint -> Formatted result logged in `/workspace/mcp-logs`.

Example 2: Filesystem / Database MCP Server (Local STDIO Process)

- **Command:** `npx -y @modelcontextprotocol/server-filesystem /data/reports`
- **Transport:** Standard I/O (`stdin/stdout`) via JSON-RPC 2.0 protocol.
- **Tools:** `read_file`, `write_file`, `list_directory`.
- **Security:** Strict sandboxing restricts file read/write strictly inside the assigned folder.
